# About us

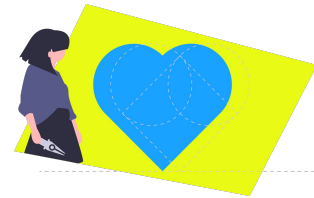

## Gain experience in developing products for the Japanese market

We established and developed in May 2018. After 3 years of accumulated experience, we have built a team of young, creative, and proactive leaders. Currently, we aim to generate products, solve social problems, and develop sustainably.

## Documentation and management system

Caerux Lab's strength is its transparent workflow management system

## Sustainable product development

Understanding the value of products, with experience in maintenance and operation of 20 products and company services every month.

## Creative development team

The creative team with developers spends 200 hours a year finding and developing new ideas.
